(Exclusive 19/03/2014)

Dyn has recently opened an office in Sydney (originally reported March 17, 2014, RustReport). IRD has been informed that the office will be more than a sales satellite as it is set to hire customer support and network operations staff who will be housed there. The office formalises its commitment to the APAC region and is part of its intentions to build a strong global company. Sydney was a natural fit for Dyn as it has customers and partners in the region. The operations are set to be led by Martin Ryan, former CEO of MetaCDN. The company can be reached at <mailto:hello@dyn.com> Dyn is an Internet performance solutions provider and its two specialities are Traffic Management (Managed DNS) and Message Manager (transactional and bulk email sending). Brand recognition will be built via leadership, PR, prospecting and events as this model has been successful in other parts of the world. With more than 40% of global Internet users in APAC, Dyn is excited by the prospects of the region.
